

HEMINGWORTH

Stabilizer Essentials

SuperSolv (Cold Water Soluble Film)

Hemingworth SuperSolv Topping effectively holds down the nap of the fabric during embroidery, creating a smooth surface and preventing stitches from sinking down into the fabric. Although commonly used on thick, fuzzy fabrics like towels, try using SuperSolv on any other fabric that absorbs stitches, such as piqué knits. After use, carefully tear away the excess topping away and dissolve any remnants with water.

Hemingworth SuperSolv topping will leave your embroidery looking crisp and well defined every time!

Available Roll Sizes

30cm x 10m
30cm x 25m
55cm x 10m

WashAway (Warm Water Soluble Non Woven)

Ideal for freestanding projects such as lace work and appliques, Hemingworth WashAway lends support and stability during embroidery and then is easily dissolved completely in warm water, leaving only beautiful embroidery behind. Hemingworth WashAway is a non woven Fibre style stabilizer, both strong and soft, and can be embroidered with or without fabric.

Use Hemingworth WashAway any time both sides of the embroidery will be seen, or use as a backing for sheer fabrics such as organza, tulle, silk or nylon and rinse away when embroidery is complete.

Available Roll Sizes

30cm x 10m
30cm x 25m
55cm x 10m

Perfect for Zündt Lace

Iron on Hooping Paper

Hemingworth Iron on Hooping Paper is a Polymer Coated paper perfect for use with stretch or knitted fabrics. In fact it's ideal for any fabric that tends to lose shape during the hooping process. When combined with one layer of Hemingworth TearAway or CutAway (depending on the fabric to be embroidered) you will be assured wonderful results.

Using a hot iron to apply, the special polymer coating sticks without the use of a glue which allows it to be easily removed from any fabric so you won't have any pulled stitches or unsightly residue left on your embroidery.

Available Roll Sizes

35cm x 20m

TearAway Medium & Heavy

Hemingworth TearAway is a medium-weight tearaway stabilizer perfect for use with non-stretch, woven fabrics. Simply hoop one sheet of TearAway underneath the fabric and when embroidery is complete, easily tear the excess backing away from the design. Because Hemingworth TearAway is made from the highest-quality materials, it can be torn in multiple directions and only one layer is needed for excellent stability.

Hemingworth TearAway can be used on any weight of fabric and is ideal for designs with a low to medium stitch count.

Available Roll Sizes Medium Weight

30cm x 10m
30cm x 25m
55cm x 10m

Pre-Cut Sheet Sizes Medium

20cm x 20cm 50 sheets

Available Roll Sizes Heavy Weight

30cm x 10m
30cm x 25m
55cm x 10m

Pre-Cut Sheet Sizes Heavy

41cm x 25cm 50 sheets

Also Now available in Pre-Cut Sheets

This is a great way to buy stabilizer. Pre Cut sheets are convenient and easy to use. Best of all they offer great value.

CutAway Medium

Hemingworth CutAway is ideal for use with stretchy, non-stable fabrics such as t-shirts, sweatshirts and polar fleece. Not only does Hemingworth CutAway stop the stretch and stabilize the fabric during the embroidery process; the remaining backing trapped underneath the stitching helps keep the design's shape even after repeated laundering.

Hemingworth CutAway is a medium-weight stabilizer, perfect for designs up to 18,000 stitches. Simply hoop one sheet of CutAway behind the fabric and, after embroidering, trim the excess backing away!

Available Roll Sizes Medium Weight

30cm x 10m
30cm x 25m
55cm x 10m

Pre-Cut Sheet Sizes Medium

20cm x 20cm 50 sheets
